UV-700BB

Water purification using physical filtration and Ultra Violet (UV) disinfection is the ideal configuration for most residential water treatment applications. This is the same type of water treatment that is used in many bottled water plants, sized for use in your own home.

These systems feature 2 filtration stages and UV disinfection, and are pre-assembled and mounted on a stainless steel backboard for easy installation.

UV-250BB

Uses: Ideal for home, cottage, condo, motor home. The UV-250BB system serves up to 4 people, while the UV-700BB system serves up to 6 people.

Features: Dual fine filtration to remove sediments, taste, odour and chemicals. UV disinfection to kill any and all pathogens, making the water completely safe to drink.

Benefits: Easy to install. Clean water guaranteed. Extremely low cost per volume. Unlimited treatment capacity.
